

UBeTrack™ mobile storage system

UBeTrack™ is a space-saving storage system with mobile racks.

The structure is very light so the mobile racks can be moved quickly. The result is a unique storage system made from anodized aluminium and high-quality, antistatic synthetic materials, which means it can be used in both sterile storage and non-sterile environments.

By positioning the runner system at the top good hygiene is guaranteed and it is easy to get past with transport trolleys.

The modular, space-saving UBeTrack™ storage system is a hygienic solution for small spaces with which you save up to 75% of corridor space and up to 33% of the total footprint.

» Easy assembly

The UBeTrack™ assembly is based on the UBeFlex® concept so it is easy and very quick to assemble. Since we use a single tracking system which is positioned on top of the unit and wheels on the bottom, there is no need for a track on the floor. Nothing to trip over!

The packages containing the parts are easy to carry and fit in a standard lift.

» Modular construction

ISO D-type and DIN D-type columns can be combined with each other and with D-type shelves of up to 47 1/4 inch. The same shelf-combinations must be fitted within one block however.

The maximum depth for working ergonomically is around 90 35/64 inch. For example, this corresponds with 5 ISO D-type columns or 6 DIN D-type columns whether combined with shelves or not.

» Hygienic

The tracking system, which is positioned at the top, has a protective cover over it preventing dust from falling on and accumulating in the track. This also allows for easy cleaning and disinfecting.

This top mounted track keeps floors clear and allows for easy cleaning of the floors and easy navigating through the unit with carts or trolleys.

» Design

With regard appearance the design fits in seamlessly with the existing UBeFlex® range so that both can be combined beautifully in one space.

» Castors

The wheels on the mobile shelves have very low rolling resistance.

» Extremely strong

In column set-up, UBeTrack™ has a load capacity of 55 lbs per pair of runners and in shelf set-up max. 30 lbs per shelf element. For details, see technical data sheet.

» Optimum labeling

The shelves can be fitted with newly designed "click" label holders. These simply click onto any position on the front of the shelf and can be fitted with an insert. Because these label holders do not protrude above the edge of the shelf, you can take larger packets or containers from the shelves without a hitch.

There are specific label holders for the columns that can also simply be clicked onto the profiles. All versions can be found further back.

» Identification

As an option you can fit the UBeTrack™ with coloured PVC strips (packs of 10) to replace the standard grey profiles to personalize your storage per department or, for example, to use colour coding for location allocation per discipline in the storage within your CSSD.

» Operation and construction of set-ups

The UBeTrack™ always consists of 1 full set-up that additional extension set-ups can be linked to.

One UBeTrack™ can consist of 2 or 3 mobile shelves. The total width can vary, see the illustration below. This can be increased in $0\frac{63}{64}$ inch increments up to a maximum of $9\frac{27}{32}$ inch which in turn alters the width of the walkway.
