

# OptiScanBan<sup>®</sup> Label Holders

# Increase the efficiency in the replenishment of goods in a Kanban-FIFO approach

# Characteristics

- ✓ Time saving thanks to the very simple operation  
→ no more turning cards manually
- ✓ Compatible with various baskets and modules
- ✓ Clicks very well on the edge of the baskets or on the shelves  
→ no risk of the inserts falling on the floor
- ✓ No loose parts that can be lost
- ✓ Ready for the automated OptiScanBan® in a later phase

# Working with the OptiScanBan® label holder

- In the Kanban - FIFO system, 2 compartments are used to store goods in modules or baskets.
- The goods are available in the consumption compartment at the front and the spare compartment at the rear. The user takes goods from the consumption box – **green** indication.
- If the front consumption box is empty, the user sets the label holder to **red**. The user takes pending the replenishment of the goods from the spare compartment at the back.
- The logistics employee who delivers the goods moves the remaining goods from the rear spare compartment to the front consumption compartment and places the new goods in the rear spare compartment. Indication turns **green** again and the FIFO cycle can start again.
- The pull-out tab offers an extra function and can be used to indicate that the product is no longer in stock but is on order or can be useful as another indicator.

# Identification of the products

- In case of manual scanning, you only have to apply a linear or 2D barcode on the red surface.
- If you start with the automated OptiScanBan<sup>®</sup>, Belintra supplies you with the labels prepared with the 2D barcodes for both the green and red areas, possibly personalized with the name of your organization.
- In both cases you must apply two labels of 50 mm x 25 mm (2" x 1") yourself. These clearly state the description of the product, the article number, the location, the units, etc.
  - The choice for this label has to do with the regular availability on the market and the usable surface area to display the above information in a legible way.

# Various applications

On baskets and modules

On the label holder for UBeFlex® shelves

In combination with a rail for mounting on cupboard doors

Aalbroekstraat 3A, B-9890 Semmerzake
